Brian Falconer, a conservationist, mariner and ecotourism industry leader with over 35 years experience sailing the coast, will share his perspective and experiences with BC's coastal carnivores. Brian will also speak about Raincoast's innovative solution to buy commercial trophy hunting tenures and shoot wildlife with cameras, not guns.

Proceeds from the event will help secure a fourth commercial trophy hunting tenure, the Nadeea tenure.

The evening will also showcase photography from a unique collection, One Shot for Coastal Carnivores, that features images from 12 outstanding wildlife photographers.
